

TLC wins.

A Competitive Comparison Between Total Living Coverage® and MoneyGuard® Reserve Plus (MoneyGuard)

Help your clients stay in control of their financial future – with leverage and protection benefits that outshine MoneyGuard.

Greater Leverage

- Offering, on average, 4.9 times premium leverage for long term care (LTC) protection; MoneyGuard only offers 4.5 times. For a client paying \$100,000 Initial Premium into Total Living Coverage® (TLC), this translates into \$42,000 more for the LTC Pool; \$14,000 more for the death benefit; and \$583 more for the LTC Monthly Maximum than MoneyGuard.
- Providing 6 to 15 percent more guaranteed LTC and death benefits than MoneyGuard through attained age 89 on average.
- Providing 6 to 15 percent greater LTC and death benefits than MoneyGuard in all years, on average (based on current rates and charges).

The Advantage of Full Underwriting

- Providing 10% lower decline rates.¹
- Generating substantially more leverage for preferred risk classes.

Better Protection

- Offering preferred and couples discounts; MoneyGuard does not.
- Including superior Privileged Care® Coordination Services at Genworth Life's expense and not out of the coverage maximum. MoneyGuard provides fewer services and does take the expense out of the coverage maximum.
- Waiving all charges while on LTC claim whereas MoneyGuard does not. This is an important feature because 30% of all Genworth past claimants have recovered.²

Genworth Life has the best Linked Benefit Guarantees in the Industry. In this example the 65 year old client is guaranteed to have 22.1 percent more benefits until at least age 88.

* If TLC were to drop to its guaranteed assumptions on DAY 1 of the policy and remain at those levels for the life of the policy, then the secondary guaranteed amount will start at age 88. If one or all of the guaranteed assumptions start at a later date, future Annual Statements will show the secondary guaranteed values will come into play at an older age than 88 or never at all. If no policy loans are taken, only TLC will guarantee that the policy will not lapse, and the owner will never have to pay more premiums.

Generally, life insurance death benefits are payable to the beneficiary income tax-free. In addition, the law provides that cash values that accumulate within a life insurance policy grow on an income tax deferred basis and are not subject to income tax until withdrawn from the policy or the policy terminates. Monthly charges to pay for long term care insurance are not included in the gross income of the policyowner, but reduce the owner's income-tax basis (not below zero).

This policy may be considered a Modified Endowment Contract. This means that if you take a policy loan or withdrawal from the policy values, you may have income tax to pay if the amount of the policy value is higher than the amount you paid for the policy.
